

# Cradle to Grave

## Medical Waste Management Cycle

### How You Safely Manage Regulated Waste at Your Facility

#### Segregating Your Waste

Customer separates waste generated at facility by waste type following **BWS's classification guide** and all local or state regulatory guidelines.

#### Packaging & Labelling Your Regulated Waste

Customer packages and labels waste following **BWS's packaging instructions** and DOT requirements. These may vary from state to state.

#### Storing Your Regulated Waste

Customer stores packaged regulated waste on-site until BWS scheduled pick up. Storage guidelines and time limits may vary from state to state.

### What BWS's "Cradle to Grave" Service Includes

#### BWS Pick-up

BWS Route Service Technician picks up regulated waste based on customer's pick up schedule or route optimized availability if customer is "On-call".

#### BWS Transportation

BWS Route Service Technician transports regulated waste back to BWS treatment facility following all DOT and regulatory compliance guidelines.

#### BWS Treatment & Disposal

BWS treats waste on-site adhering to all compliance regulations using autoclave technology eliminating all infectious material prior to final disposal.

#### Digital Documentation

BWS provides all customer documentation online through the **BWS Client Portal** and are retained for the required retention period to ensure compliance.
